

Polyethylene

BorSafe™ HE3498-LS-H

Orange high density Polyethylene compound for the coextrusion of indentifying stripes on black PE100 pipes

Description

BorSafe HE3498-LS-H is a bimodal polyethylene compound produced by the advanced Borstar technology.

The compound contains a stabilisation package that has been specifically designed to fully protect the polyethylene against thermal and UV degradation. Furthermore, it has a pigment system that gives a bright colored stripe, even when extruded as a thin layer on a black pipe.

Applications

BorSafe HE3498-LS-H recommended for the production of indentifying stripes of black pipes produced from BorSafe HE3490-LS and BorSafe HE3490-LS-H :

Gas distribution

Physical Properties

| Property | Typical Value | Test Method |
|--|-----------------------|-------------|
| Data should not be used for specification work | | |
| Density | 951 kg/m ³ | ISO 1183 |
| Melt Flow Rate (190 °C/5,0 kg) | 0,25 g/10min | ISO 1133 |

Storage

BorSafe HE3498-LS-H should be stored in dry conditions at temperatures below 50°C and protected from UV-light. Improper storage can initiate degradation, which results in odour generation and colour changes and can have negative effects on the physical properties of this product.

Safety

The product is not classified as dangerous.

Recycling

The product is suitable for recycling using modern methods of shredding and cleaning. In-house production waste should be kept clean to facilitate direct recycling.
