

Description

Daploy WB130HMS is a propylene-based, structurally isomeric polymer.

Applications

Thermoformable, foamed films and sheets
Lightweight packaging trays, beakers and containers
Microwaveable food packaging
Technical foams for automotive applications such as
headliners, carpet backing
Door liners

Parcel shelves Water shields Thermal and acoustic insulation Under the hood acoustic panels Cushioning and protective packaging

Special features Daploy WB130HMS is optimised to deliver:

Improved processability High stiffness High service temperature Foamability in foam extrusion processes Good insulation properties of foamed materials

Physical Properties

Property	Typical Value Data should not be used for	Test Method specification work	
Melt Flow Rate (230 °C/2,16 kg)	2,0 g/10min	ISO 1133	
Flexural Modulus	1.900 MPa	ISO 178	
Tensile Modulus	2.000 MPa	ISO 527-2	
Tensile Strength	40 MPa	ISO 527-2	
Heat Deflection Temperature A	60 °C	ISO 75-2	
Heat Deflection Temperature B	110 °C	ISO 75-2	
Charpy Impact Strength, notched (23 °C) 1	3,0 kJ/m ²	ISO 179/1eA	
Charpy Impact Strength, notched (-20 °C) 1	1,0 kJ/m²	ISO 179/1eA	

¹ Measured on injection moulded specimens acc. to ISO 1873-2

Processing Techniques

The actual conditions will depend on the type of equipment used.

Specific recommendations for processing conditions can be determined only when the application and type of equipment are known.

Storage

Daploy WB130HMS should be stored in dry conditions at temperatures below 50°C and protected from UV-light. Improper storage can initiate degradation, which results in odour generation and colour changes and can have negative effects on the physical properties of this product.

Safety

The product is not classified as a dangerous preparation.

Please see our "Safety data sheet" / "Product safety information sheet" for details on various aspects of safety, recovery and disposal of the product. For more information, contact your Borealis representative.

Recycling

The product is suitable for recycling using modern methods of shredding and cleaning. In-house production waste should be kept clean to facilitate direct recycling.

Related Documents

The following related documents are available on request, and represent various aspects on the usability, safety, recovery and disposal of the product.
