

Polypropylene

HG455FB

Polypropylene Homopolymer

Description

HG455FB is a polypropylene homopolymer intended for fibre applications

Applications

HG455FB is recommended for

Fine filament count at high spinning speeds
Spunbonded nonwovens

POY production

Special features

HG455FB is optimised to deliver:

Easy processability
Anti-gasfading stabilisation
Optimal product consistency

Very good flow
Controlled rheology

Physical Properties

Property	Typical Value	Test Method
Data should not be used for specification work		
Melt Flow Rate (230 °C/2,16 kg)	27 g/10min	ISO 1133
Melting temperature (DSC)	161 °C	ISO 11357-3
Molecular weight distribution	Very narrow	

Processing Techniques

The actual conditions will depend on the type of equipment used.

Storage

HG455FB should be stored in dry conditions at temperatures below 50°C and protected from UV-light. Improper storage can initiate degradation, which results in odour generation and colour changes and can have negative effects on the physical properties of this product.

More information on storage is found in our "Safety data sheet" / "Product safety information sheet".

Safety

The product is not classified as dangerous.

Please see our "Safety data sheet" / "Product safety information sheet" for details on various aspects of safety, recovery and disposal of the product. For more information, contact your Borealis representative.

Polypropylene **HG455FB**

Recycling

The product is suitable for recycling using modern methods of shredding and cleaning. In-house production waste should be kept clean to facilitate direct recycling.

Related Documents

The following related documents are available on request, and represent various aspects on the usability, safety, recovery and disposal of the product.
