

Vistalon™ 8700

Ethylene Propylene Diene Terpolymer Rubber

Product Description

Vistalon 8700 EPDM rubber is a high Mooney viscosity, medium ethylene content, high diene content terpolymer and is produced with ExxonMobil Chemical's proprietary technology offering bimodal molecular weight distribution. This product is sold in dense bale form.

Key Features

Major applications include extruded profiles. Features include a combination of excellent mixing and fast extrusion with a high collapse resistance for precise profile geometry. Designed to provide a single grade solution with high mixing and extrusion productivity.
