

Exceed™ 2018HA

Metallocene Polyethylene Resin

Product Description

Exceed 2018HA is a metallocene catalyzed ethylene-hexene copolymer. Films made from Exceed 2018HA have outstanding tensile, impact strength, and puncture. These superior strength properties, along with excellent drawability, makes this a very versatile packaging film resin. The higher melt index also makes this polymer ideally suited for blending into LDPE rich films.
