# HF2508

Linear Low Density Polyethylene

### **Product Description**

The HF2508 resin is a pelletized linear low density polyethylene selected by customers for applications that require an enhanced combination of stiffness, maximum strength and toughness. This product offers excellent additive homogeneity, requires no transfer equipment modification, and facilitates clean and safe handling. Typical applications include heavy duty shipping sacks, trash can liners, commercial and industrial packaging, as well as food and consumer packaging. The HF2508 resin offers enhanced film strength, drawdown, toughness and stiffness.

Application	Bags & Pouches; Can Liners; Food Packaging Film; Heavy Duty Shipping Sacks; Liner Film; Retail Carryout Bags; Shrink Film
Market	Flexible Packaging; Rigid Packaging
Processing Method	Blown Film; Sheet and Profile Extrusion

### Notes

Film sample used for testing was 1.0 mil gauge, 2.5:1 BUR.

These are typical property values not to be construed as specification limits.

#### **Processing Techniques**

Recommended processing conditions for this product are a melt temperature of 400 - 450 °F and a 1.5 to 3.0:1 blow-up ratio.

Using proper techniques, these products can readily be drawn below 0.90 mils at optimum production rates.

Specific recommendations for resin type and processing conditions can only be made when the end use, required properties and fabrication equipment are known.
