

# ORGASOL®

# 2002 ES6 NAT 3

ORGASOL® 2002 ES6 NAT 3 is spheroidal polyamide 12 powder with a narrow particle size distribution and an average diameter of 60µm.

ORGASOL® 2002 ES6 NAT 3 has a melting temperature of 177°C. An extremely high level of quality is achieved through rigorous control of the particle size distribution & porosity, ensuring excellent consistency of performance.

ORGASOL® is a range of high performance ultra-fine polyamide powders used as multifunctional additives in coatings, inks, varnishes and technical compounds.

The introduction of ORGASOL® polyamide powders in formulations is easy thanks to their good dispersion capacity, their reduced Impact on rheology and their low density.

ORGASOL® polyamide powders are surface modifiers, specifically designed for gloss control, texture creation and haptic properties adjustment. They also improve blocking resistance and reduce coefficient of friction.

Abrasion, scratch, impact resistances and flexibility of coatings, inks and varnishes and technical compounds can be significantly improved using ORGASOL® polyamide powders.

POWDER PROPERTIES	VALUE	UNIT	TEST STANDARD
Appearance	White spheroidal powder	-	Visual
	≤ 40µm	10	%
Particle Size Distribution	≥ 80µm	5	%
	Median Size	60	µm
		0.00236	in

## APPLICATION PROPERTIES

- **Texturing agent (smooth texture)** Texture depends on amount of Orgasol® polyamide powder, dry coating thickness and conditions of curing.
- **Abrasion & Scratch resistance improvement** reinforces the mechanical properties of the coating
- **Anti-slippery additive** Increased roughness of the coating and easily cleanable surface
- **Compatible with most resins used in coating industry** suitable for solvent-based, water-based and 100% solid UV-curable systems

## MAIN APPLICATIONS:

- Coil coating
- Floor coating
- Wood coating
- Plastic coating

## PACKAGING

This grade is delivered in 20kg bag.
