

# KYNAR 500®

# FSF®

**Kynar 500® FSF® PVDF** resin is used by leading coating formulators as a base vehicle in long-life coatings for aluminum, galvanized steel and aluminized steel.

Today, **Kynar 500® FSF® PVDF** resin-based metal coatings provide billions of square feet of protection against weathering, aging and pollution on commercial, industrial, institutional and residential buildings around the globe. The capability of Kynar 500® resins to deliver long-term durability is unparalleled in the industry. Introduced in 1965, Kynar 500® resin-based coatings were the original high performance finishes for architectural metal. According to a recent survey, Kynar 500® finishes are still the architect's first choice.
