Polypropylene 3429

Technical Data Sheet
Polypropylene – Homopolymer
Produced in the United States

Description

Polypropylene 3429 is engineered with an LTHA additive system that gives excellent bleach resistance in hot/wet environments that contain bleach and laundry detergents.

UL Rating: 3429 has a UL rating at 120°C (248°F).

FDA: 3429 complies with all applicable FDA regulations for food contact applications.

Recommended Applications: 3429 is recommended for appliance parts and is particularly suited for parts that are exposed to a hot/wet environment such as: washing machine, dishwasher and coffee machine parts.

Processing: 3429 resin processes on conventional injection molding equipment with typical melt temperatures of 390°F-450°F (200°C-232°C).
