# Desmoflex® 50055 NAT XRD3 (PRELIMINARY DATA)

### Teknor Apex Company - Modified Thermoplastic Polyurethane

#### **General Information**

#### **Product Description**

Desmoflex 50055 NAT XRD3 is a high performance thermoplastics elastomer that is designed for a variety of consumer applications including sport application. Desmoflex 50055 NAT XRD3 is a opaque, medium hardness, low density and good recovery grade that is designed for injection molding.

Moisture can degrade the material. Drying is suggested. This can be accomplished by placing the material in a desiccant dryer for 3 to 4 hours, between 65°C to 80°C.
