

AKROMID® UL PRELIMINARY A3 GF 30 8 HU black (8112)

PA66 GF30

AKROMID® A3 GF 30 8 HU black (8112) is a 30% glass fibre reinforced, heat ageing resistant polyamide 6.6 with high rigidity and strength. This UL94 HB all colors listed grade is suitable for technical components in household appliances and mechanical engineering. This grade is listed according to KTW-BWGL, NSF61 and WRAS and complies to the EU10/2011 requirements. It doesn't meet the FDA requirements.

Processing

The values mentioned are recommendations. We only recommend desiccant / dry air dryers or vacuum dryers. Too long a drying time and the resulting residual moisture content below the lower limit can lead to filling problems and surface defects. The specified drying time refers to closed and undamaged bagged material. When processing from previously opened bags or from octabins with polyolefin inliners, a longer drying time may be necessary. It is recommended to check the residual moisture content after the drying process.
