

AKROLOY® PRELIMINARY

PARA GF 35 1 FR natural (9022)

PARA GF 35 FR(40)

AKROLOY® PARA GF 35 1 FR natural (9022) is a 35% glass fibre reinforced, flame-retardant and heat-stabilized polyarylamide with very high rigidity and strength. The material is based on a flame retardant system that is free of red phosphorus, PFAS, zinc borate and melamine. The product has high flowability, excellent surface quality and low warpage. Applications include components that require a low creep tendency, even in a conditioned state, or excellent arc resistance. It is therefore also suitable as a replacement for components made of duroplastic materials. It is also the perfect candidate for thermal runaway requirements.

Features

electrically neutral flame retardant surface modified reduced moisture easy flow E-Mobility

Properties

Modulus

14.500 MPa

Strength

190 MPa

Impact

50 kJ/m²

Mechanical Properties

Processing

The values mentioned are recommendations. We only recommend desiccant / dry air dryers or vacuum dryers. Too long a drying time and the resulting residual moisture content below the lower limit can lead to filling problems and surface defects. The specified drying time refers to closed and undamaged bagged material. When processing from previously opened bags or from octabins with polyolefin inliners, a longer drying time may be necessary. It is recommended to check the residual moisture content after the drying process.

D	Drying time	4 - 12 h
	Drying temperature ($\tau \leq -30^{\circ}\text{C}$)	80 °C
	Processing moisture	0,02 - 0,08 %
1	Feed section	60 - 80 °C
2	Temperature Zone 1 - Zone 4	240 - 270 °C
3	Nozzle temperature	240-280 °C
4	Melt temperature	240 - 280 °C
5	Mold temperature	120 - 160 °C
→	Holding pressure, spec.	300-800 bar
←	Back pressure, spec.	30-100 bar
	Injection speed	medium to high
	Screw speed	5 - 10 m/min
