

**Styrolux® ECO S BC60**

SB

INEOS Styrolution

Styrolux® ECO S BC60 comprises clear styrene butadiene copolymer. The grade has in general an intrinsic toughness, is easy to process and works as modifier and compatibilizer not only in polystyrene but in many other polymers, e.g. polyolefins. For Styrolux® ECO S BC60 food contact statements are available upon request. Styrolux® ECO S BC60 is a very rigid grade designed to be blended with Styrolux® ECO T in shrink film applications. It enables high performance film extrusion, increases the stiffness of the film and improves the storage stability of film reels (reduced natural shrinkage). Styrolux ECO S BC60 is an ISCC compliant product leading to a substitution of fossil source styrene with ISCC certified bio-attributed styrene.

### Delivery form

Pellets

### Certifications

Contains renewable resources, Food approval, ISCC Plus

### Special Characteristics

Transparent

### Injection Molding

As a rule, the Styrolux® granules do not have to be pre-dried. However, in the event of unfavorable storage or transportation conditions involving severe temperature fluctuations, moisture can condense on the surface of the granules and this then has to be removed in a pre-drying step. The granules should be pre-dried in a dry-air dryer for 3 to 4 hours at a temperature of about 50°C.

#### PROCESSING

Melt temperature, range: 180 - 250°C

Mold temperature, range: 30 - 40°C

### Film Extrusion

#### PROCESSING

Blown film, Melt temperature: 180°C
