

Technical Data Sheet

WALOCEL™ MKX 25000 PP 11

Cellulose Ether

Description

WALOCEL™ MKX 25000 PP 11 Cellulose Ether is a non modified hydroxyethyl methyl cellulose (HEMC). It is compatible with all conventional mineral binders and additives used in cement spray plaster formulations.

Applications

- Cement spray plaster applications – one / two-coat cement based plaster
- Cement-based lightweight plaster
- Cementitious parts of a stucco of exterior insulation and finish system (EIFS)

Benefits

- High standing strength
- Stabilization of air voids
- Good workability
- Enhances water retention
- Quick dissolution

Physical properties

Appearance	White powder
Solubility	Water soluble
Viscosity (1), mPa·s	25,000 -32,000
Moisture content, %, max.	6%

(1)2% solution in water, Haake Rotovisko RV 100, shear rate 2.55s⁻¹, 20°C

These properties are typical but should not be considered specifications. For detailed specification rates please consult the product Certificate of Analysis.
