

Technical Data Sheet

WALOCEL™ MKX 15000 PP 25

Hydroxyethyl Methyl Cellulose

Description

WALOCEL™ MKX 15000 PP 25 modified hydroxyethyl methyl cellulose (HEMC) is designed to enhance the quality and processing characteristics of cement spray plaster applications such as one- or two-coat cement-based plaster, cement-based lightweight plaster and the cementitious parts of a stucco or exterior insulated finish system (EIFS). Compatible with all conventional mineral binders and additives used in cement spray plaster formulation, WALOCEL™ MKX 15000 PP 25 provides good workability, quick dissolution and water retention.

Applications

- Cement spray plaster
- EIFS

Benefits

- Quick dissolution
- Water retention
- Good workability

Physical properties

Appearance	Powder
Solubility	Water Soluble
Viscosity (1), mPa·s	15,000
pH ((2% solution)	Neutral
Moisture content, %, max.	7

(1)2% solution in water, Haake Rotovisko RV 100, shear rate 2.55s⁻¹, 20°C

These properties are typical but should not be considered specifications. For detailed specification rates please consult the product Certificate of Analysis.
