

AuroraGuard™ FFD0065

Aurora Material Solutions, LLC - Polypropylene

General Information

Product Description

Chemblend® FFD0065 is a proprietary blend developed by Aurora Material Solutions. It is used as an additive for increasing the flame resistance of Polypropylene. This additive is produced in a low melt, high impact PP base.

Appearance:

- Off white color in round beads or cylindrical shaped pellets.

Technical Data:

- This additive should be added to the base PP at the appropriate level to achieve desired flammability properties.

Properties:

- Dust Free Pellet
- 6.5% active ingredients in the PP base

Application:

- Injection Molding, Profile and Sheet Extrusion

Formerly known as Chemblend FFD0065

General

Material Status	• Commercial: Active		
Availability	• Africa & Middle East	• Europe	• North America
	• Asia Pacific	• Latin America	
Uses	• Masterbatch		
Appearance	• Off-White		
Forms	• Pellets		
Processing Method	• Injection Molding	• Profile Extrusion	• Sheet Extrusion
