

LLDPE FV149M

YUCLAIR FV149M is butene-1 copolymer designed for use in general purpose film application. YUCLAIR FV149M provides stronger film than ones made from competitive LLDPE film grades. Therefore YUCLAIR FV149M shows superior tensile strength, tear strength, gel-free, antiblock and sealability. Outstanding clarity and good processibility make this resin an ideal choice for film application when blended with conventional LDPE. YUCLAIR FV149M can be processed readily into blown film using standard extrusion techniques. YUCLAIR FV149M complies with FDA regulations in 21 CFR177.1520 for all food contact.
