Titanvene™ HD5740UA Heavy Duty Injection Moulding Applications

Titanvene™ HD5740UA is an ultra violet (UV) light stabilised high density polyethylene copolymer with a narrow molecular weight distribution, specially developed for injection moulding of heavy duty articles. Titanvene™ HD5740UA is characterised by its high rigidity, high impact resistance (especially for low temperature) and high weathering resistance.

Applications

Titanvene™ HD5740UA is designed for:

- Caps and Closure
- Large dustbin and pails
- Fish crates/pallet boxes
- Technical parts

Recommended Processing Conditions ⁽¹⁾

Titanvene™ HD5740UA can be easily processed on normal polyethylene injection moulding machines at temperatures in the range of 200°C to 240°C.

Food Contact Compliance

Titanvene™ HD5740UA can be used in food contact applications. Please contact your nearest PT. Lotte Chemical Titan Nusantara representative for more detail of food contact compliance statements for the specific grade.
