

H350EG

HOMOPOLYMER

FOR EXTRUSION COATING / LAMINATION

Repol H350EG is recommended for use in Extrusion Coating / Lamination process. Repol H350EG is an ideal material for coating of polypropylene woven fabrics. Repol H350EG is designed to provide excellent flow characteristics, low neck-in & consistent processability, good surface finish & gloss and excellent adhesion to substrate.

Typical Characteristics			
Property	Test Method	Unit	Typical Value*
Melt Flow Index (230°C/2.16 kg)	ASTM D1238	g/10 min	38
Tensile Strength at Yield (50mm/min)	ASTM D638	MPa	34
Tensile elongation at yield (50mm/min)	ASTM D 638	%	9
Flexural Modulus (1% secant)	ASTM D790A	MPa	1500
Notched Izod Impact Strength (23°C)	ASTM D256	J/m	24
Heat Deflection Temperature (455 kPa)	ASTM D648	°C	104

* Typical values, not to be taken as specification. All the mechanical properties as per ASTM D638 Type I specimen injection moulded in accordance with ASTM D4101

Applications

Coating of polypropylene woven fabrics

Regulatory Information

- Meets the requirements stipulated in IS 10910 on 'Specification for Polypropylene and its Copolymers for safe use in contact with foodstuff, pharmaceuticals, and drinking water'. Additives incorporated in this grade conform to the positive list of constituents as prescribed in IS 10909. The grade and the additives incorporated in it also comply with the FDA:CFR Title 21,177.1520, Olefin polymers

Storage Recommendations

- Bags should be stored in dry/ closed conditions at temperatures below 50°C and protected from UV/ direct sunlight
