

Technical information

TEREZ[®] SAN 2011 G

Clear SAN with excellent flowability.

TECHNICAL DATA SHEET

Product text

Scratch resistance long article.

Properties	Value	Unit	Test method
Density	1,0800	g/cm ³	ISO 1183
Melt flow index (MFI)	21,00	g/10 min	ISO 1133
MFI Temperature	220	°C	ISO 1133
MFI Load	10,00	kg	ISO 1133
Impact strength Charpy 23°C, dry	16	kJ/m ²	ISO 179
Tensile stress at yield	72	MPa	ISO 527
Flexural strength, dry	98	MPa	ISO 178
Tensile-modulus, dry	3800	MPa	ISO 527
HDT 1,80 MPa	101	°C	ISO 75
Vicat B/50	101	°C	ISO 306
Burning Behav. at thickness h	HB	class	UL 94
Thickness tested	1,6	mm	UL 94
UL recognition	-		UL 94

PROCESSING DATA SHEET

Processing guidelines for injection molding of TEREZ SAN 2011 G

The processing data sheet provides guidelines about processing as well as pre-drying.

MATERIAL PREPARATION

Storage

Store in a dry place protected from direct sunlight. Avoid all sources of ignition like extreme heat, sparks, or open flame.

Drying

For the manufacturing of mechanically and optically optimal injection molding parts, we recommend following pre-drying conditions according to the table below. If the container is open (wet granules), the drying time can be extended accordingly.

Dry air dryer

Temperature	80°C
Time	4 hours
Due point	-40°C

Residual moisture

<= 0.1% (recommended)

MACHINE REQUIREMENTS

PROCESSING

Basic settings

Temperatures

Processing temperatures

Hopper	60 - 80°C
Center	220 - 250°C
Nozzle	240 - 260°C

Mold temperature

Temp.	40 - 80°C
-------	-----------

You should try to keep the residence time short, especially at high temperatures to avoid material degradation.

Instructions for cleaning

The aggregate can be cleaned by using low MFI polypropylene. You can also use standard cleaning granulate.
