

Product Information

**VESTAKEEP® 1000 CF30**

**CARBON FIBER-REINFORCED, LOW VISCOSITY POLYETHER ETHER KETONE**

**VESTAKEEP® 1000 CF30** is a low viscosity, carbon fiber-reinforced (30%) polyether ether ketone for injection molding.

The semi-crystalline polymer features superior mechanical, thermal, and chemical resistance. Parts made from VESTAKEEP® 1000 CF30 are self-extinguishing.

VESTAKEEP® 1000 CF30 can be processed by common injection molding machines for thermoplastics.

We recommend a melt temperature between 380°C and 400°C during the injection molding process. The mold temperature should be within a range of 160°C to 200°C, preferably 180°C.

VESTAKEEP® 1000 CF30 is supplied as granules in 25 kg boxes with moisture-proof polyethylene liners.

Pigmentation may affect values.

Inside the original and undamaged packaging, the product has a shelf life of at least 2 years when stored in dry rooms at temperatures not exceeding 30°C.

For information about processing VESTAKEEP® 1000 CF30, please follow the general recommendations in our brochure "VESTAKEEP® PEEK Processing Guidelines".

**Key Features**

**Industrial Sector**  
Industry and Engineering

**Resistance to**  
Fire / burn

**Processing**  
Injection molding

**Additives**  
Carbon fibers

**Delivery form**  
Pellets, Granules

**Mechanical properties ISO**
