

Product Information

# VESTODUR® X7396

## LOW-SHRINKAGE, POLYMER-MODIFIED POLYBUTYLENE TEREPHTHALATE COMPOUND

**VESTODUR® X7396** is an unreinforced, heat-stabilized and polymer-modified polybutylene terephthalate (PBT) compound with low shrinkage for extrusion.

The compound is especially suitable for the manufacture of stiff, small-diameter tubing, e.g. loose buffering for fiber optics.

Compared with standard PBT compounds VESTODUR® X7396 has a higher hardness. This permits cable jacketing as a protective cover against rodent attacks.

VESTODUR® X7396 is supplied as cylindrical pellets in polyethylene packaging.

In the brochure "Engineering thermoplastics for high performance secondary fiber optic jacketing" instructions are given on the extrusion of loose or tight buffering for fiber optics.

For information please follow the general recommendations in our flyer "VESTODUR® Polybutylene terephthalate - Compounds".

The use of colorants may affect property values.

Inside the original and undamaged packaging, the product has a shelf life of at least 2 years when stored in dry rooms at temperatures not exceeding 30°C.

### Key Features

**Processing**  
Extrusion

**Delivery form**  
Pellets, Granules

**Resistance to**  
Heat (thermal stability), Hydrolysis / hot water

Mechanical properties ISO	dry	Unit	Test Standard

## Diagrams

### Specific volume-temperature (pvT)

## Characteristics

### Applications

Electrical and Electronical, Fiber optic cable

### Processing

Film extrusion

### Special Characteristics

U.V. stabilized, High heat resistant, Low warpage / Low shrinkage

### Features

Termite and rodent resistance

### Color

Natural color

### Additives

Heat stabilizer

### Chemical Resistance

Hydrolytically stable
