

ELTEX[®] P KS350

Product Technical Information

Polypropylene - Heat Seal

Benefits & Features

ELTEX[®] P KS350 offers a very low heat seal temperature (10°C below that of ELTEX[®] P KS400 type random copolymers) and contains anti-block and slip additives. It is developed primarily for the sealing layer in "coextruded bioriented film" for food and technical packaging.

Applications

- 2nd generation terpolymer specially developed for sealing layer in "coextruded bioriented film" for food and technical packaging.

Storage

The product should be stored in a dry and dust free environment at temperature below 50°C. Exposure to direct sunlight should be avoided as this may lead to product deterioration. It is advised to process the product within maximum one year after delivery.
