

PREADD AO 181

0611

PREADD AO 181 is an antioxidant/processing stabilizer masterbatch developed to give a good balance of long term heat and processing stability to PE-HD and PP.

PREADD AO 181 is based on a blend of phenolic and phosphite antioxidants. They improve the processing stability and prolong the life of the final product.

PREADD AO 181 is approved for use in contact with foodstuffs according to FDA and BgVV regulations, as long as the dosage level of PREADD AO 181 is less than 1.5 % in PE and less than 1.8% in PP.

Appearance	Granule
Carrier	PE-LD
Colour	Transparent
Additive	Phenolic & phosphite antioxidant, 20 %
Density	0.92 g/cm ³
Temperature stability	< 320 °C
Dosing	0.5 - 3 %
Moisture content	Max. 0.15% when produced
Packaging	1000 kg in 20 kg PE valve bags on a one-way stretch wrapped pallet
Storage	Can be stored for one year in its original package. Packages should be stored indoors.

The information in this data sheet represents typical values obtained by us and should not be regarded as a specification.

We condition that the product will be inspected and qualified by the customer for his process to meet the specific requirements set by application, processing equipment and end product.
